Questions for the Cabinet:

- Will the EVP continue to attend Staff Council meetings on rotation, or will the President's Council act as our feedback loop?
- How does the President's Council change the functionality of the Staff Council— do our recommendations still go directly to the VP, or do they come to the President's Council?
- What is our role, if any, with project teams? Specifically the two project teams who do not have a President's Council member elected to serve on them?
- Ultimately, what is the hierarchy of decision making under this new model?
